PROFESSIONAL SUMMARY

Entry-level Network Support Engineer / NOC Technician (Fresher) with hands-on lab experience across Cisco routing and switching, TCP/IP, IPv4/IPv6 addressing, subnetting, VLANs, inter-VLAN routing, OSPF, NAT, ACLs, DHCP, and network troubleshooting. Practical experience configuring and supporting Windows Server, Active Directory, DNS, DHCP, Group Policy, Hyper-V/VMware virtualization, and Linux (Ubuntu, RHEL) system administration. CCNA 200-301 trained; certified in Cloud Computing with AI. Seeking an entry-level Network Support, NOC, Help Desk (Tier 1/2), or Network Engineer role.

CORE TECHNICAL SKILLS

Networking (Practised): Cisco Routing & Switching, TCP/IP, IPv4, IPv6, IP Addressing & Subnetting, VLAN, Inter-VLAN Routing, OSPF, NAT, ACL, DHCP, EtherChannel, LAN/WAN Troubleshooting, Network Monitoring

Basic Knowledge: BGP, HSRP

Windows Server & Active Directory (Practised): AD DS, DNS, DHCP, Group Policy, NTFS, FSRM, DFS, Hyper-V, Event Viewer

Basic Knowledge: FSMO Roles, WDS, Failover Clustering

Linux Administration: Ubuntu, RHEL, File Systems, File Permissions, User & Group Management, Package Management, Process & Service Management, Log Management, Networking Basics

Cloud Computing (AWS): EC2, Lambda, ECS, EKS, S3, EBS, RDS, VPC, Route 53, IAM

Tools & Platforms: Cisco Packet Tracer, Wireshark, PuTTY, VMware, Hyper-V, VS Code, Jira, Zoho (Ticketing Systems)

Programming / Scripting: Python (Basic - scripting fundamentals)

RELEVANT EXPERIENCE / HANDS-ON PROJECTS

Enterprise Network Design & Implementation | 2026
Cisco Packet Tracer | Self-Directed Lab Project

- Designed and deployed a multi-department enterprise network topology spanning 4 departments (HR, Finance, IT, Sales) across 3 VLANs, improving logical segmentation and internal security.
- Configured inter-VLAN routing to enable communication across department networks; deployed DHCP to automate IP assignment for 10+ simulated end devices.
- Implemented OSPF dynamic routing, NAT for internet connectivity, and ACLs for traffic control and network security.
- Diagnosed connectivity issues using ping, traceroute, and Cisco IOS show commands, validating end-to-end network functionality.

Windows Server & Active Directory Lab | 2026
VMware / Hyper-V | Self-Directed Lab Project

- Built a Windows Server lab environment on VMware and Hyper-V to simulate enterprise domain infrastructure.
- Configured AD DS, users, groups, and Organizational Units (OUs) for centralized identity management.
- Deployed DNS and DHCP; applied Group Policy Objects (GPOs) and NTFS permissions to enforce access controls.
- Performed system troubleshooting and log analysis using Event Viewer and native Windows administrative tools.

EDUCATION

Bachelor of Commerce (B.Com.) — 2026
Indira Gandhi National Open University, Kolkata

Jetking Certified Cloud Computing Professional with AI — 2026
Jetking Infotrain Ltd., Kolkata

PROFESSIONAL TRAINING & CERTIFICATIONS

- CCNA 200-301 - Network Fundamentals Course - Simplilearn
- Networking Basics - Cisco Networking Academy
- Operating Systems Basics - Cisco Networking Academy
- Introduction to Generative AI - Google Cloud
- Describe Windows Server Administration Tools - Microsoft
